Fiverr

With a track record as a Fiverr freelancer since 2019, I bring extensive experience to the table. Count on me for dependable and top-notch services, ensuring exceptional outcomes that exceed expectations.

PROJECTS

Insurance management system   4th Semester

The Insurance Management System is a dynamic solution built with ASP.NET, CSS, Bootstrap, and SQL Server. It efficiently handles policy management, claims processing, customer information, and financial transactions. With a user-friendly interface and secure data storage, it simplifies and streamlines insurance operations.

E-learning (AL-Hadi) website   5th Semester

AL-Hadi E-learning is a modern website built with the MERN Stack (MongoDB, Express.js, React.js, Node.js). It offers a diverse range of courses, interactive quizzes, and personalized learning experiences. Users can enroll, access resources, and track their progress easily.
